## Handheld Binoculars

The 10x42 Handheld Binocular series is engineered for versatile professional use, providing superior optical performance for military and law enforcement personnel across all environmental conditions. Designed with a high-fidelity 10x magnification capability, it ensures clear target identification and long-range observation. The system features advanced fully multi-coated optics and ultra-wide band coating to maximize light transmission and visual clarity.

A ruggedized, high-performance optical platform designed for durability and precision in the field. With shockproof construction and life-long guaranteed optical performance, the 10x42 binocular combines ergonomic handling with professional-grade diopter and parallax adjustments to meet the most demanding operational standards.

### General Specifications

**Optical Precision:** Delivers 10x magnification supported by parallax and diopter adjustment for customized visual sharpness.

**Advanced Coatings:** Utilizes fully multi-coated lenses and ultra-wide band coating technology to enhance image brightness and contrast.

**Field Resilience:** Features shockproof construction and a waterproof design, ensuring reliability in diverse tactical and environmental scenarios.

### Technical Specifications

- Prism Type : BAK-4
- Magnification : 10X
- Angle of View : 5,6°
- Field of View : 96m @ 100m
- Brightness : 17,6
- Eye Relief : 14mm
- Waterproof : Yes
