# A341 / A361

## Night Vision Weapon Sight

Engineered for superior performance in low-light and no-light tactical operations, the A341 and A361 deliver exceptional clarity, precision, and reliability for professional users who demand dominance after dark. The A341 offers 4x magnification while the A361 provides 6x magnification, both featuring high-resolution image intensifier tubes and a crisp, illuminated reticle designed for rapid target acquisition and accurate engagement at varying distances. Powered by a single AA battery, these sights ensure extended operational runtime without compromise.

Built to withstand the harshest environments, the A341/A361 series is fully ruggedized with MIL-STD-810G environmental compliance, operating reliably across an extreme temperature range of -51°C to +51°C. Their waterproof design and robust construction guarantee consistent performance in rain, humidity, and demanding field conditions. Featuring a quick-detach MIL-STD-1913 (Picatinny) compatible mount, adjustable reticle brightness in 5 levels, and an intuitive ballistic reticle, these sights integrate seamlessly with a wide range of assault rifles and precision platforms. The lightweight yet durable housing minimizes added weight while maintaining exceptional ergonomics during prolonged missions. Standard accessories include a carrying case, lens cleaning kit, objective lens covers, and flip-up lens caps. Optional enhancements such as an IR illuminator and laser aiming device further expand mission flexibility.

### General Specifications

**Mission Versatility:** Features independent monocular flip-out modules with automatic shut-off and overlight protection for enhanced tactical adaptability.

**Integrated Performance:** Optimized for logistical simplicity with single-AA-battery operation and an integrated IR illuminator for zero-light conditions.

**Environmental Integrity:** Fully compliant with MIL-STD-810G standards, ensuring operational stability from -51°C to +51°C with certified submersible performance.

### Technical Specifications

- Magnification : 4x / 6x
- Field of View : 10° / 6.3°
- Eye Relief : 25 mm
- Diopter Adjustment : -6 / +2
- Reticle : Duplex/Mil-Dot/Custom Design
- Reticle Adjustment : 1.5 cm @ 100m / 1cm @ 100 m
- Battery : 1xAA 1.5 VDC
- Weight : 1200 gr / 1380 gr
