VEGA A940

Weapon Day Sight

Operational environments often shift from wide-open terrain to confined urban spaces in an instant. This 1X-4X Dual-Magnification system is purpose-built for such fluidity, allowing operators to toggle between rapid, short-range reflexive fire and long-range ballistic accuracy without changing their platform. By integrating both a high-contrast red-dot and a specialized mil-dot reticle, the optic ensures total target dominance across diverse engagement envelopes.

Built for the Extreme

Reliability is non-negotiable when mission success is on the line. This optic is engineered to maintain peak performance under MIL-STD-810G conditions, thriving in environmental extremes from -32°C to +55°C. Its STANAG 4694 compatible architecture ensures a rock-solid interface with modern weapon systems, while the intuitive zeroing and brightness adjustments allow for immediate field readiness. Whether navigating "silent-watch" missions or high-intensity combat, this ruggedized solution provides the clarity and resilience required for modern defense.

Technical Specifications

- Magnification : 1x-4x
- Field of View : 26° - 6.5°
- Eye Relief : 70 mm
- Reticle : Red-Dot & Ballistic (BDC)
- Reticle Adjustment : 1 cm @ 100 m
- Reticle Brightness : Red-Dot - 5 Levels Ballistic - 5 Levels
- Battery : CR2032
- Operation Time : 500 hours
- Weight : 650 grams (with mounting adapter)
- Size : 147 x 74 x 65 mm
